## READ AND RESPECT . . . . .

Some workers look at safety posters and warning signs like they listen to that low-pitched music you hear in shopping centers, etc. These people give signs and posters a casual glance and maybe even read the words, but the message never really sinks in. This is a bad habit to get into. Posters and signs aren't there just to decorate the wall. They aren't meant to be taken casually. They're for your protection. Read them and respect them!
